

Disciplined process. Efficient delivery.

Process & Flow LLC provides marketing, education, and applied AI services to federal, state, and local government agencies, prime contractors, and teaming partners, with structured program oversight from kickoff through closeout.

CORE COMPETENCIES

Marketing & Communications

Public affairs, strategic communications, and marketing program support for government and public sector organizations.

Education & Training

Instructional design, curriculum development, and training delivery for government and public sector personnel.

Applied AI & Technology

AI-enabled data and decision-support solutions built around agency operational requirements.

Growth Strategy & Acquisition

Audience research, targeted campaigns, and partner-driven outreach that reach and enroll the people programs serve.

Business Development & Outreach

Market mapping, prospect research, and executive outreach that open doors for attraction, partnerships, and investment.

Program Management & Delivery

Structured oversight, stakeholder coordination, deliverable management, and execution support across complex engagements.

DIFFERENTIATORS

- Small business: clients work directly with the team managing their engagement, without added layers of internal hand-off or bureaucracy.
- Over 20 years of professional services experience in marketing, education, and applied technology.
- Combined capability across communications, training, and applied AI in a single small business.

PROGRAM MANAGEMENT APPROACH

Every engagement follows a defined program management lifecycle, with clear deliverables and consistent oversight at every stage: Discovery → Planning → Execution → Delivery.
